

June 28, 2011

Dear Members of the Growth Management Planning Council,

Please support Smart Growth Policies that:

- Prioritize a transportation system that is safe for all users, including pedestrians, transit riders, and cyclists of all ages and abilities;
- Encourage biking and walking as viable forms of transportation; and
- Create livable, transit-oriented communities that provide other options for traveling to school, work, and the grocery store

This greatly improves quality of life and providing transportation for all people.

Thanks,

Séamus Kelly
